

new for 2005

**XP**  
METAL  
DETECTORS

**Gold**  
GMAXX

**GMAXX II**

**ADVENTIS 2**

**ADX 250**

## Power and Sensitivity !

18 kHz

- New powerful, entirely reworked circuit board, combining performance together with higher sensitivity to winkle out the "goodies"
- Faster recovery than previous models enabling you to find deeper targets near iron
- New fine-tuning utilising "IRON THRESHOLD" allows you to identify iron as a low tone very precisely, giving YOU control<sup>(1)</sup>
- Wireless headphone transmitter (new 2 channel version) already built into

• UK Goldmaxx Powers are specifically set up for UK ground conditions and now reject coke in the "Auto" position

(1) except Adventis 2/ADX 250 (2) except ADX 250

- the circuit boards of these four new detectors
- New FREQ SHIFT switch on the front of the detectors to reduce any interference from other XP machines being used nearby.
- Change the channel of the Wireless headphone (Ch1/Ch2)
- Change the frequency of the detector, (Freq 1/ Freq 2)
- Improved graduation of the sensitivity settings
- New 9" coil made with carbon fibre including a newly designed coil cover
- New versatile hipmount bag doubling as a control box cover
- Shaft is 3 part with twin locking collar system<sup>(1)</sup>
- Microprocessor analysis of signals
- Multi-tone discrimination in ALL METAL mode<sup>(1)</sup>
- Volume control for low Tone (iron volume)<sup>(1)</sup>

- All Metal : Motion mode
- SILENCER switch : 3 position to limit iron false signals<sup>(1)</sup>
- Ground Exclusion : adjustable<sup>(2)</sup>
- Cable with double electromagnetic shielding, designed to resist movement failures
- Light and perfectly balanced
- Tough polypropylene armcup
- Fibreglass lower stem
- Power : 8 x 1.5v AA Alkaline batteries
- Battery life : Alkaline : 50 Hours
- Coil cover and hipmount bag provided
- Optional : Rechargeable Nimh Batteries, Onboard 240v charging via coil socket charges all 8 batteries at once for convenience

## New wireless headphone: WS1 "Two channels"

- Two switchable channels (Ch1/Ch2) to stop interference between detectorists
- Foldable Backphone type wireless headphone
- Digital microprocessor transmission with no white noise or background hiss
- Adjustable volume with memory
- Compact and lightweight, only 70g 1 battery included
- The headphones feature a charger connector and 3.5 mm audio socket to connect it to any other headphones
- Built in extra flat rechargeable Lithium battery (7g), without memory effect
- 50 hours battery life
- Fast Lithium charger : 2 hours
- Charge monitoring system and full charge LED
- No external unit and no additional power supply for the transmitter, as it is already installed on the circuit board of new XP detectors
- Available as an option for most previous XP models
